

Outline

07.04.2005 miniViews Podcast

- Intro
- Delicious Library
 - Organise your books, movies, music and games
 - Allows iPod synchronization
 - Unfortunately, I don't have an iPod, so I can't test it out
 - Design
 - Shelves
 - Shows covers of titles unless Amazon.com doesn't have its info
- Information
 - Entering info
 - Enter title
 - Enter bar code
 - Scan bar code
 - Enter details by yourself
 - Downloads info from Amazon.com
 - If Amazon.com doesn't have info, enter own info
 - Even if it downloads from Amazon.com, you can enter you own info such as
 - Rating
 - Notes
 - Purchase date/price
 - Location in house
 - Also shows similar titles
- Unfortunately, it doesn't allow info importing from anything besides Amazon.com, so if Amazon doesn't have that information, you'll have to enter it yourself
- Allows you to add a new collection if books, movies, music and games isn't enough
- Allows you to add borrowers for your stuff
 - Gives you a menu of your Apple Address book contacts
 - If the borrower isn't on the list, gives you the option to enter a new borrower
 - Seems to recognize if the contact is male or female
 - Drag titles to a borrower, and it's listed as "Out"
 - Allows you to select a due date for the borrower to return it to you
 - Makes a new Calendar in iCal called Library Loans, and lists due dates as new events
